EXPERIENCE

WORKVED SPACE PVT LTD (WEB DEVELOPER) | ([Workved](#))

OCT 2024

Workved is a company specialized in Interior designing and production of interior products for corporate offices. They also provide workspace to clients who are looking for a peaceful environment to work.

- Led project planning, delegated tasks, and ensured on-time milestone delivery.
- Implemented new features and UI/UX improvements to enhance overall user experience.

Projects:

Workved Interiors | ([workved.com](#))

- Created BOQ generation platform from scratch using Vite, Tailwind CSS & Supabase.
- Integrated advanced libraries (Three.js, Swiper, Lottie, GSAP, Framer Motion, jsPDF, EmailJS) for interactivity and professional functionality.

Frameazy (E-commerce Website) | ([frameazy.com](#))

- Built frame-selling platform with Next.js & Tailwind CSS, deployed on GoDaddy & Vercel.
- Integrated PhonePe (payments), Cloudinary (image storage), and MongoDB (data management).

Fastone (Trading Website) | ([fastoneglobalmarkets.com](#))

- Developed complete frontend using React & Tailwind CSS with smooth animations.
- Built responsive landing pages and login system; deployed on Vercel.

603 Coworking Space | ([603thecoworkingspace.com](#))

- Enhanced UI, fixed bugs, and optimized performance using React (TypeScript) & Tailwind CSS.
- Maintained deployment on Vercel & GoDaddy.

SOFTTACT TECHNOLOGY (TRAINEE SOFTWARE DEVELOPER). | ([Softtact Technology](#))

JAN 2024

- Developed and maintained pCare, a C# desktop medical software with a MySQL backend, improving system stability and performance.
- Enhanced the pCare web application by contributing to features built with React, ASP.NET, and Web API, leading to a better user experience and functionality.
- Automated PNDT form submission using Selenium with Chromium, integrating database-driven user details to significantly reduce manual effort.
- Collaborated with cross-functional teams to debug, test, and optimize application modules, ensuring compliance with healthcare standards.

PROJECT

1. **SHAISHRADDHA** (Android Restaurant Application | Java) ([Github](#)).
2. **Attendance System** (Attendance System using QR Code | Python) ([Github](#)).
3. **Crypto-Bubbles** (Cryptocurrency-bubble | React) ([Github](#)) | ([Crypto-Bubble](#)).
